DETAILED ACTION

1. Applicant's election with traverse of group III and the species of figures 9 and 10B in the reply filed on 8-8-05 is acknowledged. The traversal is on the ground(s) that figures 9 and 10B should be grouped as one embodiment and that the accessories as broken out should not be separated via the election requirement. After review of applicant's comments, the examiner agrees to withdraw the separation of figures 9 and 10B as independent species. Regarding the separation of the various accessories, the examiner remains of the position that such accessories are properly separated for election purposes. Finally it is noted that applicant has canceled claims to the non-elected groups, and no arguments are presented which specifically address the claim group restriction portion of the requirement.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 22-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention. Applicant timely traversed the restriction (election) requirement in the reply filed on 8-8-05.

3. While an examination on the merits for non-elected claim 23 is not included herein, in an effort to expedite prosecution, it is noted claim 23 depends from itself.

4. The disclosure is objected to because of the following informalities: the specification does not include a brief drawing description for figure 10J. Additionally, on page 11 – line 4, "elongated" is misspelled.

Appropriate correction is required.

Art Unit: 3612

5. Claims 20-21, 27, and 29-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20, "when the insert is in the deployed state" is confusing because in a previous intervening claim such state refers to the insert in a horizontal socket whereas in instant claim 20 such refers to the insert in a non-horizontal socket. Moreover, as recited it is confusing to refer to the same "deployed state" with regard to two differing positions. Claim 21, the recited plurality of horizontal sockets in the last line is confusing as it is not clear if/how such sockets relate to the previously recited horizontal socket in intervening claim 18.

Claim 27, "the plurality of body receivers" lacks antecedent basis.

Claim 29, "the socket", "the insert", and "the deployed state" lack antecedent basis.

Claim 30, "the socket" in line 2 and "the insert" in line 3 lack antecedent basis. Note these terms are additionally utilized throughout the remainder of the claim.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 15, 17-18, and 30, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Russell.

Note vehicle body horizontal receiver (@18) as broadly claimed and accessory 16.

Claims 17 and 18, see insert 22+ as broadly claimed.

Art Unit: 3612

Claim 30, note holes 52,55 and pin 53.

8. Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Curran.

Note vehicle body horizontal receiver (16) as broadly claimed and accessory 20,26+.

Claim 16, note table 20.

9. Claims 15, 19-20, and 27-28, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Vieira et al.

Note vehicle body horizontal receiver (30) as broadly claimed and accessory 42+.

Claims 19 and 27, note additional receivers 19 as broadly claimed and as best understood.

Claim 20, at least element 134 would define a vertical socket capable of receipt as broadly claimed and as best understood.

Claim 28, note accessory 35 as broadly claimed.

10. Claims 15 and 29, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Elonen.

Note vehicle body receiver (3) as broadly claimed and accessory 1.

Claim 29, note figure 3.

11. Claims 15 and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gessay.

Note vehicle body horizontal receiver/socket (10) as broadly claimed and accessory 1+ (fig 12).

Art Unit: 3612

Claim 20, side fence accepting stake pockets are deemed to define the vertical socket as broadly claimed and as best understood.

Claim 21, elements 10 define a plurality of horizontal receivers as best understood.
